# HOT ROLLED

Eratron's Hot Rolled Steel redefines industry standards with its remarkable features. Offering a wide range of products, from ultra-low carbon to various grade, with impressive thickness, width, and coil weight capacities. Ideal for line pipes, critical automobile applications, and controlled microstructures. Experience precision and performance like never before.

## HOT ROLLED APPLICATIONS

- Cold Rolling & Galvanizing
- Drawing & Press Forming
- Electrical Stampings & Forming
- Welded Tubes & Pipes
- Line Pipes
- Structural & General Engineering
- High Tensile Structural Applications
- Chequered Sheets & Plates for Structural Use
- HSLA Grade for Automobile & Other Engineering Applications
- LPG Cylinders , Energy , and Machineries
- Boiler Tubes & Pressure Vessels
- Medium Carbon Steel
- Corrosion Resistant Steel

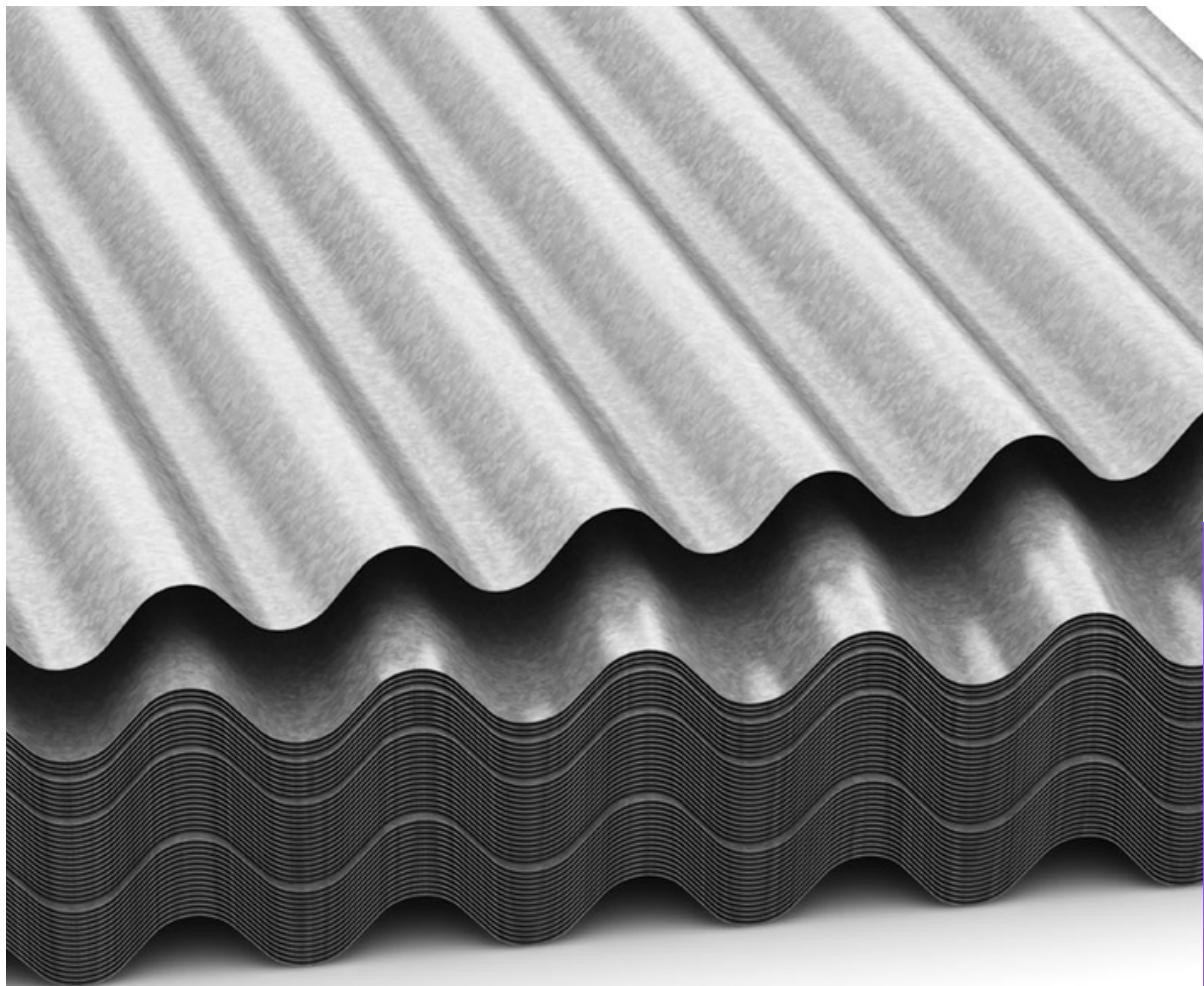

# COLD ROLLED

Eratron's Cold Rolled Steel is synonymous with cutting-edge innovation and uncompromising performance. With a dual pot system for GI and GA production, we deliver higher-strength products with Various MPa, meeting various Grade standards. Our seamless, automatic material system and top-tier technology partners ensure superior quality. We offer comprehensive steel solutions. Elevate your standards with Eratron's Cold Rolled Steel - where excellence meets innovation in every roll.

## COLD ROLLED APPLICATIONS

- Automobile
- White goods
- Cold rolled formed sections
- Furniture
- Drums & Barrels
- Electrical Panels
- Construction and Infrastructure
- Consumer Durables (AC, Freezer)
- Industrial and Engineering

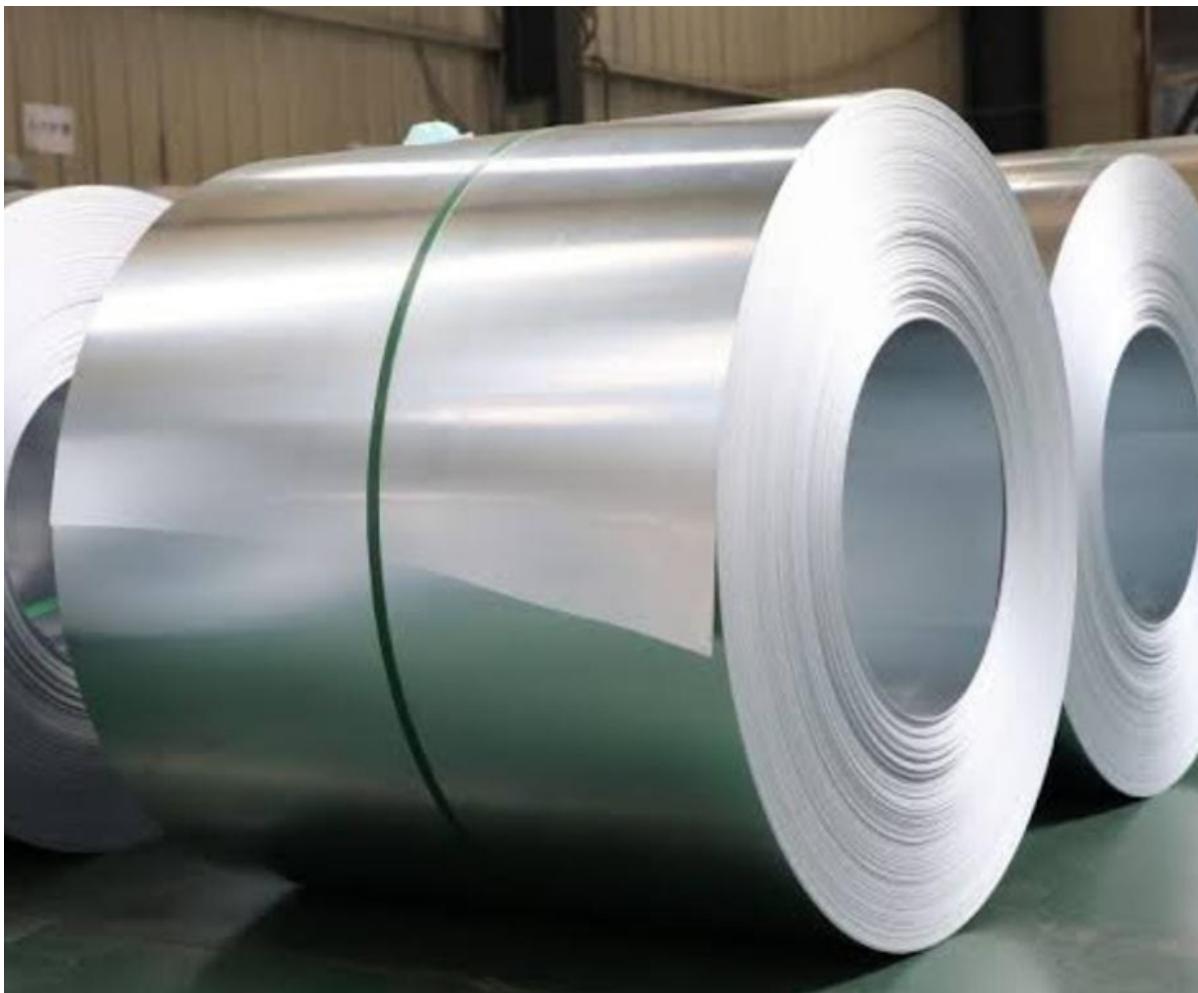

# GALVANIZED

Eratron's Galvanized Steel offers versatility with a wide thickness range, catering to diverse applications. Available in commercial, forming, drawing, and structural grades, it features customizable hardness through continuous annealing during galvanization. With computerized processes ensuring a perfect zinc coating, it guarantees rust-resistance and a longer product life. Choose from a variety of surface finishes, including bright, dull, and matte, along with options for regular or minimum spangles, allowing for customization. Moreover, these sheets can be bent and formed without zinc flaking, ensuring reliability and durability.

## GALVANIZED APPLICATIONS

- Structural Grades
- Commercial, Forming and Drawing Grades
- Roofing and Cladding
- Ducting
- Coolers
- Furniture
- Heat Plates
- Solar Heating Panels
- Electrical and Light Fittings
- Agricultural Equipments
- Automotive
- Boxes
- Sandwich panels

# GALVALUME

**Eratron's Galvalume steel offers a winning combination of performance and aesthetics. With a smooth surface and uniform spangled appearance, it boasts a superior anti-fingerprint coating for long-lasting elegance. Meeting relevant norms, it provides precise thickness with enhanced corrosion resistance, heat reflectivity, temperature resistance, and formability for your diverse applications.**

## GALVALUME APPLICATIONS

- Roofing and Cladding
- Ducting
- Coolers
- Furniture
- Heat Plates
- Solar Heating Panels
- Electrical and Light Fittings
- Agricultural Equipments
- Automotive
- Boxes

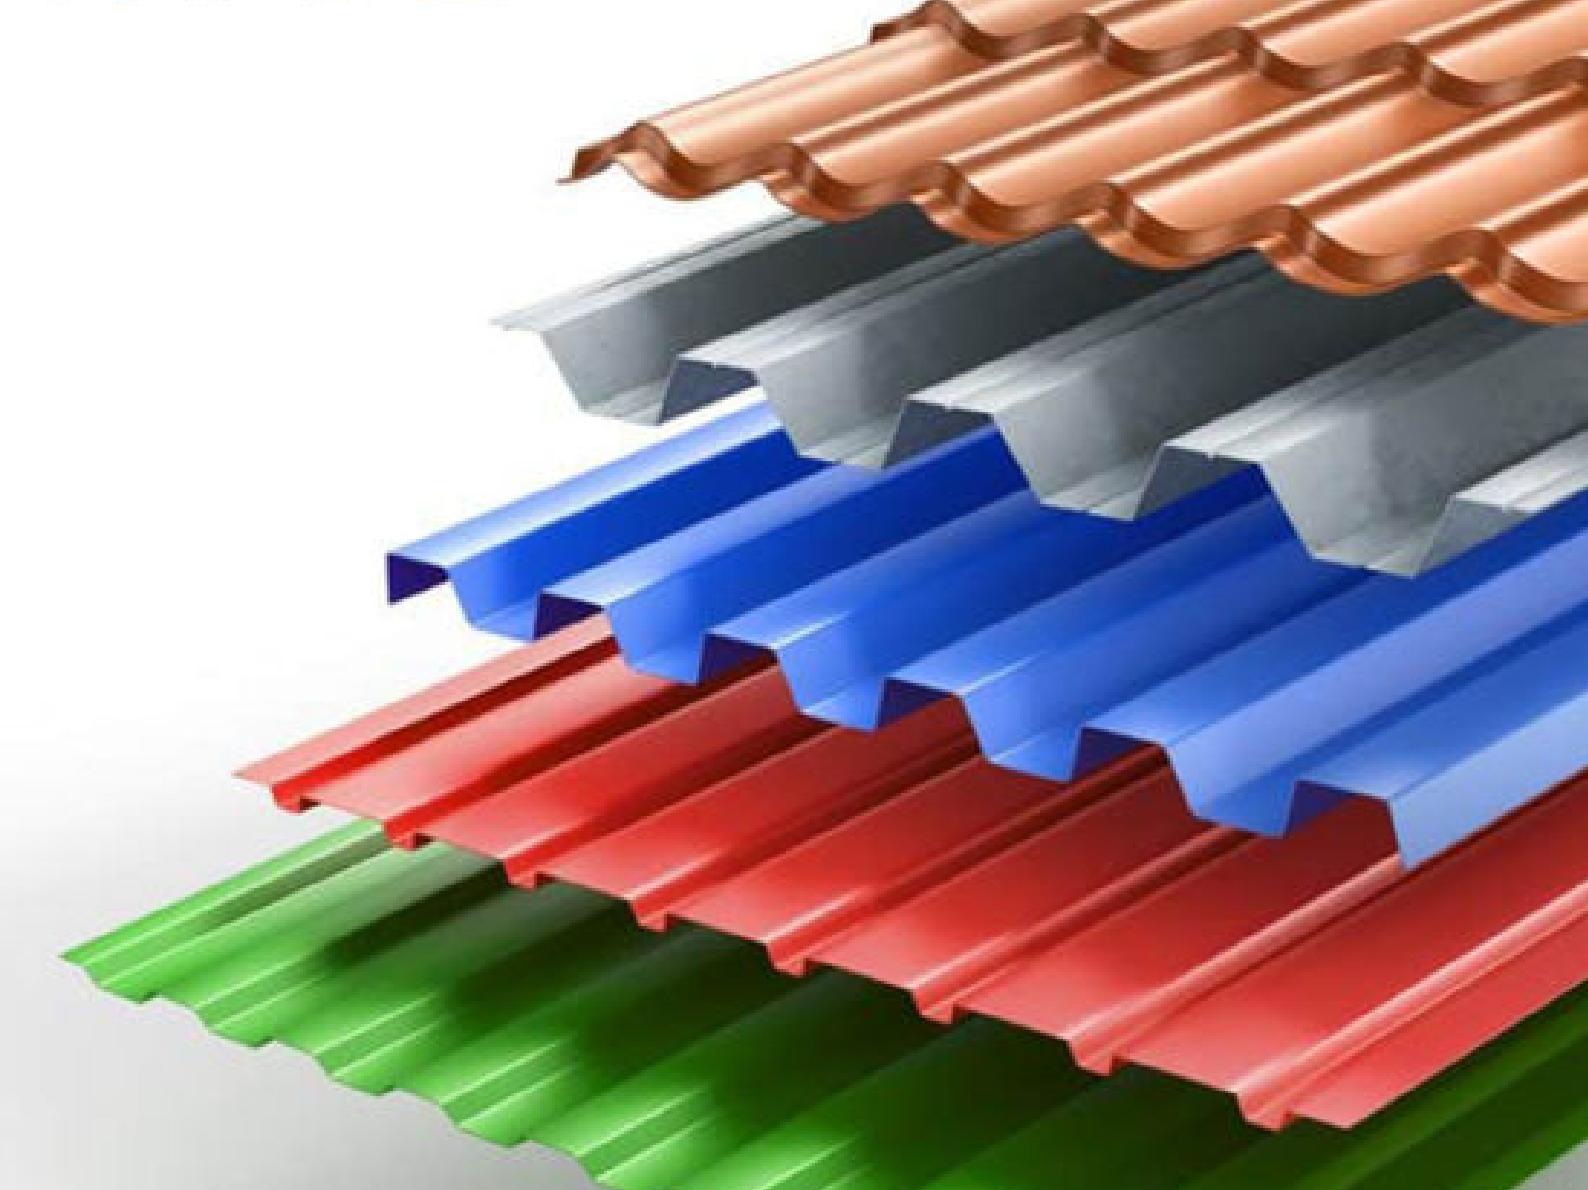

# STEEL DOORS

With Eratron's Weather-Proof Doors, bid adieu to weather-related worries as they remain steadfast in all conditions. Our Termite-Proof Doors ensure a pest-free haven, while Fire-Resistant Doors offer up to 2 hours of safety. Easy to install, they save time and stress for homeowners and contractors alike. Plus, they're eco-friendly, crafted without harm to nature. Experience peace of mind with Eratron.

# COLOR COATED

**Eratron's Color Coated Steel offers versatility with a wide selection of thicknesses, widths, colors, and profiles. Its precision finish ensures uniformity in color, gloss, texture, and film thickness, guaranteeing a polished and consistent appearance for your projects.**

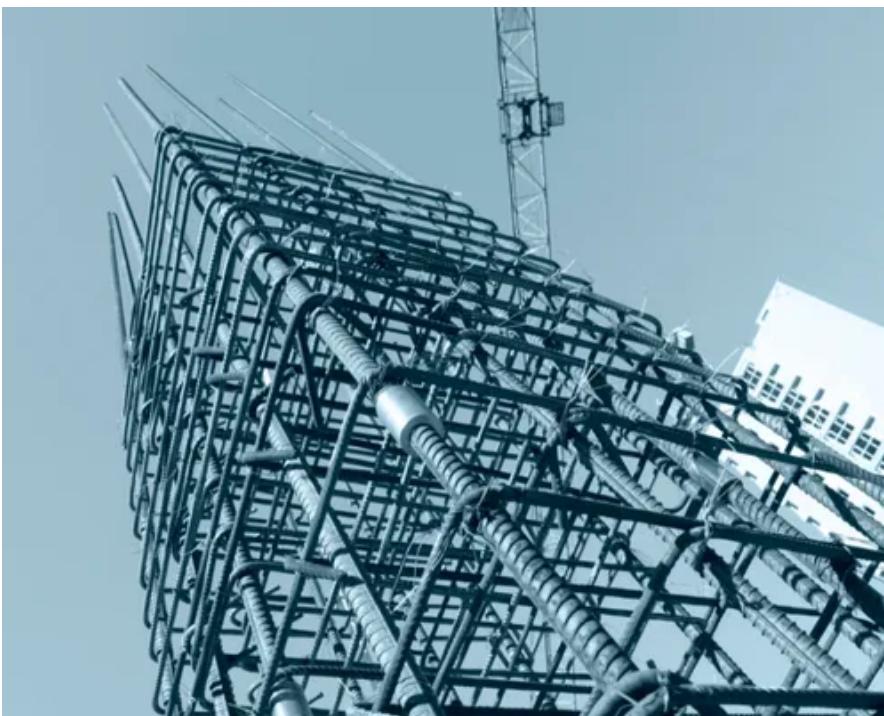

## COLOR COATED APPLICATIONS

- Roofing and Cladding
- Consumer Goods
- Furniture
- Agricultural Equipment
- Electrical and Light Fittings
- Sandwich Panels

# TMT BARS

Introducing Eratron's TMT Bars: Exceptional Purity, Unmatched Performance. Our TMT bars offer superior strength and durability with a highly pure composition. Their best-in-class rib pattern ensures perfect cement bonding, granting resilience against various loads. Earthquake resistance is heightened by a high UTS/YS ratio, while low carbon content enables effortless welding. Enjoy anti-corrosive properties, easy bendability, and superior fatigue resistance for cyclic loads. Choose Eratron for reliability and longevity in your construction projects.

## TMT BARS APPLICATIONS

- Residential Buildings
- Airports and Metro Rail
- Roads, Bridges and Flyovers
- Commercial Complexes
- Dams
- Industrial Structures
- Power Plants

# ALLOY

Eratron offers tailor-made steel solutions, crafting customized products to meet your specific needs. Our dedication to precision ensures that every alloy we provide is perfectly suited to elevate your projects and applications. Experience the power of personalized excellence with Eratron.

## ALLOY STEEL APPLICATIONS

- Building Structures
- Building Bridges
- Flat products
- Coil products
- Pipe products

# WIRE RODS

Eratron's high-speed wire rod mills, operating at an impressive 120 meters per second, ensure exceptional mechanical strength and unwavering chemical consistency. With minimal Sulphur and Phosphorous content (0.005%-0.035%) and minimal tramp elements, our wire rods exceed industry standards. Precision is assured through automated thickness control, employing advanced numerical models.

## WIRE RODS APPLICATIONS

- Automobile
- General engineering
- Cold drawing
- Cold forming
- Spring applications
- Welding and Machining
- Wire ropes
- Tools and Bearings
- Heat Treatment
- Jewellery and Cosmetics

# TERMS & CONDITIONS

## Contract Terms :

- FCA      - Free Carrier
- FOB      - Free OnBoard
- CFR      - Cost and Freight
- CIF      - Cost Insurance Freight  
& Others

## Payment Terms :

- T/T • L/C • D/P • Paypal
- Western Union • MoneyGram

# THANK YOU

## ERATRON

**Eratron:** Your premier source for a wide range of high-quality steel products, from hot rolled and cold rolled to steel doors and TMT bars, serving international markets with excellence.
